Awarded as Best Student Of Batch
B.E.-Computer Science and Engineering
CGPA : 84 %
- **THE CENTRAL SCHOOL DUBAI**
Secondary and
Senior Secondary School
CGPA : 80 %

Professional Summary

I'm a passionate software developer with 6 years of experience building secure and scalable applications, mainly in the FinTech and logistics space. I work across the full stack using Java, Spring Boot, React, React Native, and cloud platforms like AWS and Google Cloud. I've led teams on high-impact projects, including PCI-DSS-compliant systems, and enjoy turning complex ideas into simple, user-focused solutions. Known for being hands-on, reliable, and innovative, I aim to create products that make a real difference.

Professional Skills

- **Team Leadership and Mentoring**
- **Agile Development & Scrum Practices**
- **Cross-Functional Collaboration**
- **Innovation & Problem Solving**
- **Strong Communication Skills**
- **Product-Focused Mindset**
- **Process Improvement & Automation**
- **Time Management and Ownership**

Professional Experience

Technical Product Owner

Sep 2025 – Present

Timexpress | Shypv

Leading the development and management of a logistics **ERP ecosystem** with 22 integrated products. Responsible for feature planning, resolving system issues, onboarding new clients, assigning development tasks, hiring developers on demand, and ensuring compliance. Also contributing to ChatESS, an AI-powered medical assistant platform.

Team Lead & Full Stack Developer

Feb 2023 – Sep 2025

Intermo Payment Gateway | Dubai, UAE

Led the development of a secure, multi-currency payment gateway using Java, Spring Boot, React, Flutter, and AWS. Set up a fully automated CI/CD pipeline, contributed to PCI-DSS compliance, built merchant plugins, and ran campaigns that increased sign-ups by 14%.

Technical Co-Founder & Full Stack Developer

Fizon Tech

Jul 2020 – Feb 2023

Worked on full-stack and mobile projects using Laravel and Flutter. Delivered marketplace, delivery, and enterprise applications with integrated payments and admin dashboards. Developed Python microservices and Flutter apps for drone telemetry.

Abdul Rahman S BE CSE

Achievements & Certifications
